The board CPCI-8004 for the CompactPCI bus is used for the control of up to four servo or stepper motor axes through a PC. With this intelligent and flexible board, many control tasks from simple to complicated can be realised.

The board has four stepping/direction output channels (D/A channels, 16-bit). They are isolated from the digital current supply and are used for the control of commercially available power amplifiers connected as speed controlling devices or current regulators. Incremental encoders, SSI encoders and EnDat encoders as well as end and reference switches can be connected to each axis channel.

Digital PID filters with forward compensation and optional Notch filters are also involved in the axis control. The "open" controlling concept of the CPCI-8004 is intended in the first place for manufacturers of special-purpose machines and users which need a flexible integration as well as a CNC solution.

**Applications**

- Precision positioning
- CNC control
- Semi-conductor manufacturing
- Event counting
- Motion control
- Robots
- X-Y-Z position control
- Stepper motor control
- Machine monitoring
- Research and development

**Software**

A CD-ROM with the following software and programming samples is supplied with the board.

**Standard drivers for:**
- Linux
- 32-bit drivers for Windows 8 / 7 / Vista / XP / 2000
- Signed 64-bit drivers for Windows 8 / 7 / XP
- Real-time use with Linux and Windows on request

**Drivers and samples for the following compilers and software packages:**
- Visual C++ • Microsoft C Lib. • Borland C Lib.
- Visual Basic • Delphi

**On request:**
Further operating systems, compilers and samples.

Specifications

CPCI-8004

<table>
<thead>
<tr>
<th>Specification</th>

Safety

Optical isolation: 1000 V

EMC – Electromagnetic compatibility

The product complies with the European EMC directive. The tests were carried out by a certified EMC laboratory in accordance with the norm from the EN 61326 series (IEC 61326). The limit values as set out by the European EMC directive for an industrial environment are complied with. The respective EMC test report is available on request.

Physical and environmental conditions

Dimensions: 160 x 100 mm
System bus: CompactPCI 32-bit
Space required: 1 CompactPCI slot
Operating voltage: +5 V and 3.3 V ± 5 % from the PC
Front connector for CPCI-8004: Axis 1, 2, 3, 4: 78-pin D-Sub female connector
Temperature range: 0 to 60 °C (with forced cooling)

CPCI-8004

Motion control board for 4 servos or stepper motors. Incl. technical description and software drivers.

Accessories

PX8001: 3-row screw terminal panel, 50-pin, for DIN-rail mounting
ST8004: Shielded round cable, 2 m, 78-pin female connector to 2 x 50-pin male connector
